"Well, I certainly think there should be one." was his response.

The conference at the White House, which will consider the bill drafted by Colonel Hepburn and his associates, will be participated in by Attorney General Moody, Secretary Taft, and others of the President's principal advisers. Senator Elkins of West Virginia, chairman of the Senate Committee on Commerce, will, in all probability, be present.

Expects Speedy Passage.

"I have no doubt," said Colonel Hepburn, "that it will be possible to get this bill through the House before the end of the present month. The senti-ment in the House, as I understand it is strongly in favor of such legislation." Colonel Hepburn said that the commit-

tee had been at work on the preparation of the bill for some days, and that it is practically ready for submission. At the conference the bill will be discussed, and such suggestions made as will tend to make the bill a more effective instrument for the execution of the President's pet measure of reform.

SOCIAL DISSIPATION.

A young woman from a nearby town, who was recently visiting friends in Cleveland, was taken sick at the theater. It became necessary to call a doctor from the audience, and one promptly appeared at the manager's office to render her assistance. After learning her symptoms, he ordered her to take a Red Raven. She was sent home in her carriage. When the excitement was all over the manager said to the doctor, "I would serve Red Raven to every lady in my audience if I thought it would keep them well." "That is not exactly the idea," said the physician. "This is a particular case. This young woman has been suffering from too much social dissipation. She has been going somewhere every night for the last two or three weeks, no doubt. A theater with refreshments afterward, a party, a late dinner, and decidedly too many luncheons. Her system has become overtaxed. Had she occasionally taken a Red Raven she would readily have stood this strain. As it was, she allowed herself to break down. There is nothing like Red Raven for people in her condition. But the trouble is they do not all know it."

realize its value when taken into the human system for the same cleansing purpose.

Charcoal is a remedy that the more you take of it the better; it is not a drug at all but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after eating onions and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poison of catarrh.

All druggists sell charcoal in one form or another, but probably the best charcoal and most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered Willelow charcoal, and other harmless antispetics in tablet form or rather in the form of large, pleasant tasting lozenges, the charcoal being mixed with honey.

At the same time, in my opinion, there are none more intemperate than those who insist on total abstinence. I am not aware that I work barder than other min. The daily use of these lozenges will soon tell in a much improved condition of the general health, better complexion, sweeter breath and purre blood, and the seauty of it is, that no possible harm can result from their continued use, but on the contrary, great benefit.

A Buffaio physician in speaking of the henefits of charcoal, says: "I advise Stuart's Charcoal Lozenges to all patient suffering from gas in stomach and purify the breath, mouth and throat; I also believe the liver is greatly benefited by the daily use of them; they cost but twenty-five cents a box at drug stores, and although in some sense a patent preparation, vet I believe I get more and better charcoal in Stuart's Charcoal Lozenges than in any of the ordinary charcoal tablets."

Bargen Explains Process.

Bristow is well known. Before Mr. Wynne came into the Postoffice Department Mr. Bristow held the palm as an investigator, but before Mr. Wynne had been First Assistant long he showel his own ability in that line.

Thirty years' experience as a Washington correspondent for various important newspapers throughout the country had given Mr. Wynne a straspon Washington affairs such as few Government officials ever acquire. This experience stood him in good stead. He began closing in on Beavers and Machen who, feeling the results of his efforts, and knowing that they could not stay in the department if Wynne staid, retaliated by fighting Wynne for all they were worth. It was then that Wynne showed his ability not only to find out things, but to bring inducence to bear.

Created for Rathbone.

Created for the benefit of Estes G. Rachbone, of Ohio, some fifteen years ago, the office of Fourth Assistant Postmaster General grew from almost nothing to a bureau which controlled, before the detachment of the inspectors, about 150,773 persons. This growth was due to the investigation of irregularities in the postal service, beginning in Cuba, in 1800, and extending to the present. As Bristow conducted most of these investigations, he gradually got control of several departments that were not his in the postal service, beginning in Cuba, in 1800, and extending to the present.
